SUMMARY

Data Scientist and applied-AI engineer with 2+ years shipping production machine learning, decision intelligence, and LLM systems across pharmaceutical and telecom domains. Builds end-to-end — data pipelines, FastAPI services, cloud deployments on AWS and GCP, and the evaluation harnesses that decide what ships.

TECHNICAL SKILLS

Languages & Frameworks: Python (Pandas, NumPy, scikit-learn, PyTorch, TensorFlow), FastAPI, Flask, React, SQL, R, REST APIs, Streamlit

GenAI & LLM Engineering: Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG), Multi-Agent Systems, Large Language Models (LLMs), Claude (Anthropic), Azure OpenAI, AWS Bedrock, LangChain, LangGraph, Model Context Protocol (MCP), Hugging Face, Prompt & Context Engineering, Function Calling / Tool Use, Embeddings, Vector Databases (Qdrant/FAISS/Pinecone), LLM Guardrails, Evaluation Harnesses

ML & Statistics: Machine Learning, Deep Learning, NLP, Classification, Regression, Time-Series Forecasting, Anomaly Detection, Hypothesis & A/B Testing, Feature Engineering, Model Deployment, MLOps

Cloud, Data & DevOps: AWS (ECS, Lambda, Step Functions, S3, Aurora PostgreSQL, Bedrock, Redshift), Serverless, Azure, GCP, Docker, CI/CD, CloudFormation, Databricks, PySpark, Apache Hive, PostgreSQL, MySQL, BigQuery, ETL/ELT, dbt, Data Pipelines, Git, SAP

Decision Intelligence & Core: Decision Intelligence, Predictive Modeling, Prescriptive Analytics, Aera Decision Cloud, Demand Forecasting, Supply Chain Analytics, GxP / Regulated Systems, Power BI, Agile/Scrum, Stakeholder Management

WORK EXPERIENCE

Bristol Myers Squibb, Hyderabad, India

Data Scientist | April 2025 - Present

- Built a Demand Forecasting & Planning (DFP) product on the Aera Decision Intelligence platform — Touchless Forecasting automating ~42% of the BMS portfolio and cutting forecasting effort ~35%; owned the SAP → Aera → IBP → Kinaxis flow, built models within a 40+ model statistical/ML/DL ensemble, and added an Agentic AI co-pilot for model recommendation and explainability.
- Shipped a GxP audit-trail review tool on AWS (React, FastAPI, Lambda, Step Functions, Aurora) now live across 3 global sites and 750 systems, replacing a manual six-monthly per-system log review.
- Migrated master data management from SAP IBP to an Aera-native source of truth, replacing an Excel-based tool and eliminating a SAP IBP license renewal; built reusable platform-wide Remote Functions that standardized business logic.
- Mentored 4 data scientists and engineers on the Aera DFP platform and ML forecasting practices.
- Co-led two 2-day hands-on Claude workshops (60 attendees each) driving company-wide adoption: introduced agent skills, plugins, MCP and prompting practice, then coached every participant to build and demo their own use case.

Comviva Technologies, Bengaluru, India

Data Scientist | September 2023 - September 2024

- Forecasted financial and customer-acquisition KPIs at 90% accuracy using Python, SQL, and Google Cloud, improving analytics-workflow efficiency by 20%.
- Automated reporting pipelines with PySpark and Hive, cutting manual effort 20+ hours/month; analyzed 50M+ row datasets via EDA, cohort, and funnel analysis to drive a 15% retention increase.
- Automated code documentation in a proof-of-concept with the Mistral LLM, reaching 95% accuracy.

PROJECTS

agentrag — Verified-Citation RAG github.com/ArvanRawat2001/agentrag

- RAG service over 152 public FDA/ClinicalTrials.gov documents that locates every model quote in its source before display (22/22 located, zero fabricated). Evaluation harness built first: 240 span-grounded queries over 192 configurations showed dense retrieval losing to BM25 by 43-75x on exact identifiers, so it ships sparse-only. 1,116 tests.

Technologies: Python, FastAPI, Docker, BM25, Qdrant, Sentence-Transformers, Cross-Encoder Reranking, RAG, pytest

OctaSense AI — Multi-Agent EDA & Decision Copilot

- 8-agent GenAI pipeline with tiered model routing (Haiku for fast EDA agents, Sonnet 4 for reasoning) in a 5-stage parallel workflow automating profiling, anomaly detection, feature engineering, and ML recommendations from any CSV.

Technologies: Python, FastAPI, React, AWS Bedrock, Claude (Haiku + Sonnet 4), Multi-Agent Systems, Model Routing

Audit Trail Review Automation (GxP)

- Automates the six-monthly GxP review of manufacturing equipment event logs: async pipeline with reviewer-editable column mapping, saved preferences, keyword flagging, and DOCX audit reporting. The LLM is confined to mapping and formatting while every figure is computed in pandas — a deliberate anti-hallucination split for a regulated tool.

Technologies: React, FastAPI, AWS (ECS, Lambda, Step Functions, S3, Aurora PostgreSQL), Azure OpenAI, pandas, CloudFormation

EDUCATION

SRM Institute of Science and Technology, Chennai, India

B.Tech in Computer Science and Engineering | April 2023 | CGPA: 8.89/10

CERTIFICATIONS, PUBLICATION & COURSEWORK

Certifications: Building with the Claude API, Anthropic Education (2026); Google Data Analytics, Google

Publication: Email Spam Classification, IEEE, presented at ICCPC 2022

Relevant Coursework: LLM Agents; Fintech Innovations (U. Michigan)
