SUMMARY

Data Scientist with 2+ years building production machine learning, decision intelligence, and Generative AI (GenAI) solutions across the pharmaceutical and telecom domains. Proven record of forecasting business KPIs at 90%+ accuracy and shipping multi-agent GenAI systems on AWS and Google Cloud.

TECHNICAL SKILLS

Languages & Databases: Python (Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, Flask, FastAPI), REST APIs, SQL, MySQL, Google BigQuery, R

ML & Statistics: Machine Learning, Deep Learning, NLP, Classification, Regression Analysis, Time-Series Forecasting, Anomaly Detection, Hypothesis Testing, A/B Testing, Statistical Modeling, Feature Engineering, Model Deployment, MLOps

Generative AI & LLMs: Generative AI, Agentic AI, Large Language Models (LLMs), Claude (Anthropic), AWS Bedrock, LangChain, LangGraph, Model Context Protocol (MCP), Hugging Face, Prompt Engineering, Context Engineering, Function Calling / Tool Use, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases (FAISS/Pinecone), LLM Guardrails

Cloud, Big Data & MLOps: AWS (Bedrock, Redshift), GCP, Azure, Databricks, PySpark, Apache Hive, Hadoop, ETL/ELT, dbt, Data Pipelines, Docker, Git, CI/CD, SAP

Decision Intelligence & Core: Decision Intelligence, Predictive Modeling, Prescriptive Analytics, Aera Decision Cloud, Demand Forecasting, Supply Chain Analytics, Business Intelligence, Data Mining, Tableau, Power BI, Streamlit, Agile/Scrum, Stakeholder Management, Data Storytelling

WORK EXPERIENCE

Bristol Myers Squibb, Hyderabad, India

Data Scientist | April 2025 - Present

- Built a Demand Forecasting & Planning (DFP) product on the AERA Decision Intelligence platform, delivering Touchless Forecasting that automates ~42% of the BMS portfolio for SKU-level planning and reduces forecasting effort ~35% across pharmaceutical supply-chain workflows.
- Engineered complex data pipelines integrating SAP, Amazon Redshift, and the AERA platform, improving data quality and reliability across forecasting workflows.
- Replaced legacy RapidResponse processes with AERA-native solutions, reducing operating costs and improving planning performance; built reusable platform-wide Remote Functions that standardized business logic.
- Delivered an enterprise proof-of-concept for FedEx, a UI-based EDA tool generating automated supply-chain decision insights for stakeholders.
- Mentored 4 data scientists and software engineers on the Aera DFP platform and ML forecasting practices.

Comviva Technologies, Bengaluru, India

Data Scientist | September 2023 - September 2024

- Forecasted financial and customer-acquisition KPIs at 90% accuracy using Python, SQL, and Google Cloud, enabling agile business decisions and improving analytics-workflow efficiency by 20%.
- Automated reporting pipelines with PySpark and Hive, reducing manual effort by 20+ hours per month; analyzed 50M+ row datasets via EDA, cohort, and funnel analysis to drive a 15% increase in customer retention.
- Designed scalable Generative AI solutions on GCP (reducing model training time by 30%) and automated code documentation with the Mistral LLM at 95% accuracy, boosting developer productivity by 25%.

Tech Mahindra, Chennai, India

Analyst Intern | February 2022 - June 2022

- Analyzed telecom customer-usage and network-performance data in Python/SQL, improving service efficiency by 15%; modeled churn with EDA and statistical methods to inform a 10% retention improvement.

PROJECTS

Demand Forecasting & Planning (DFP) - Aera Decision Cloud

- Deliver ML-driven Touchless Forecasting on Aera Decision Cloud, owning the end-to-end forecasting cycle and data flow (SAP → Aera → IBP → Kinaxis); build models within a 40+ model statistical/ML/DL ensemble and an Agentic AI co-pilot for model recommendation and explainability across internal & external pharma products.

Technologies: Aera Decision Cloud, Python, SQL, Time-Series Forecasting, Ensemble Modeling, Agentic AI, SAP IBP, Kinaxis, Amazon Redshift, Decision Intelligence

OctaSense AI: Multi-Agent EDA & Decision Copilot

- Architected an 8-agent Generative AI pipeline with tiered multi-model routing (Claude Haiku for fast profiling/EDA agents, Sonnet 4 for reasoning agents) in a 5-stage parallel workflow automating data profiling, EDA, anomaly detection, feature engineering, and ML recommendations from any CSV.

Technologies: Python, FastAPI, React, AWS Bedrock, Claude (Haiku + Sonnet 4), Multi-Agent Systems, Model Routing, LLMs

EDUCATION

SRM Institute of Science and Technology, Chennai, India

B.Tech in Computer Science and Engineering | April 2023 | CGPA: 8.89/10

CERTIFICATIONS, PUBLICATION & COURSEWORK

Certifications: Building with the Claude API, Anthropic Education (2026); Google Data Analytics, Google

Publication: Email Spam Classification, IEEE, presented at ICCPC 2022

Relevant Coursework: LLM Agents; Python for Data Science & ML (Udemy); SQL (HackerRank); Fintech Innovations (U. Michigan)
